Our Services

FACILITY MANAGER

Facility manager at your premises takes care of your comfort, safety and overall functionality of the place.

Our qualified facility manager deals with skilled and experienced technicians to provide the utmost care to your surroundings.

With a team of electricians, plumbers, housekeeping and security guards we cultivate a sustainable environment by integrating strategic process in the place.

As a routine, facility managers check on common area functionalities, housekeeping cleaning schedules, controlling water and electricity consumption.

Our Services

SECURITY

Security implementation is designed by experts of intelligence domain who assure reliable forecast & solutions for long-term.

We provide outstanding security services for your residence or commercial purpose with best-suited plans and equipment to guard and guide the activities around.

The security guards are well trained with site-specific knowledge which allows the guards to outline the possible breaches and take preventive measures to improve the safety of the surrounding.

Our Services

HOUSEKEEPING & GARDENER

Housekeeping services are distinguished to be extensive with the assistance of supervision which ensures that the service is customized for one and all. Our services include residential, commercial, gatherings, and office support service.

Our housekeeping professional manages and helps you with day-to-day activities or you can schedule the person for weekly or monthly visits as well. We assure you to tidy up your place and maintain a healthy and hygienic environment.

Gardeners do regular watering, deweeding, lawn leveling, pruning, trimming and dead plants removal as per checklist, horticulturists maintain in house nursery at every facility.

We assure proper guidance is provided to the staff to work as per the requirement of the client to ensure customer satisfaction.

Our Services

STP (SEWAGE TREATMENT PLANT)

Thirumal Services cater to the maintenance of Sewage Treatment Plant in apartments, gated communities and in industries, The process of sewage treatment involves removing pollutants and making the water and sludge non toxic to discharge into the environment.

As you are aware this treatment plant we propose to you is a unique combination of engineering and Biotechnology - Bacterial cultures for better degradation of all substances, which we refer to as advanced Bioengineering.

Our efficient facility management services team is well-equipped to assist you in emergencies and resolve issues rapidly and effectively. We are prompt in delivering timely maintenance of the plant to ensure smooth and seamless working for the benefit of the residents.

Our Services

WTP (WATER TREATMENT PLANT)

The Water Treatment Plant is designed to process water as per the requirement.

For water quality adhered to customized needs we introduce a wide range of filtration systems that provides the water content as needed.

Maximum efficiency is achieved by traditional methods and chemical solvents for water consumption.

We take up the best suitable working principle depending on the nature of water.

Our Services

ELECTRICIAN

Our certified and skilled electricians perform preventive maintenance, earthing checks, operation of DGs and quickly diagnose and repair to provide quick solution to the electricity maintenance.

PLUMBER

Our plumbers monitor water levels in all the tanks, leakage arresting, tanker procurement and ensure round the clock water supply to residents and attend to repairs and rectify them instantly.

CARPENTER

Our skilled carpenters take up construction, installation and maintenance work in the building. From minimum adjustment work to building a cabinet or door frames.

MULTI-TECHNICAL MANPOWER

We provide skilled multi talented technicians to provide the required services under the guidance of the managers and supervisors.

Our Clients

Thirumal Services cater to several clients including Akshaya Builders, Shree Balaji Avenue, Colour County, Jains Housing and Constructions, Mahalakshmi Builders and more. We focus on delivering regular monitoring and risk assessment, well-planned preventive maintenance, swift response system to emergencies, highly knowledgeable and skilled technical hands, consistent quality check and updated safety measures.

We also excel in cost-cutting on primary expense categories like energy and water through efficient auditing, no-hassles, easy Turn-key projects and assist with expert technicians for all Mechanical, Electrical & Plumbing maintenance services.

Thirumala aims to provide excellent living standards to people and communities with primary focus on the comfort and safety of people.
